## User journey

A Gesture-based Tool for Sterile Browsing of Radiology Imag

Team ID: PNT2022TMID00692

Creating a user journey is a quick way to help you and your team gain a deeper understanding of who you're designing for, aka the stakeholder in your project. The information you add here should be representative of the observations and research you've done about your users.  $\wp$ 

1 Phases  High-level steps your user needs to accomplish from start to finish	System and camera capability		Open the user interface in the web app		Upload the image of the gesture		Perform tasks according to the gesture	
2 Steps  Detailed actions your user has to perform	Check the camera quality	Check for system compatibility	Interface must not be complex	User friendly	Open the website to upload the image	Perform the gesture according to the need	Check the sterile browsing is accurate or not	Check the accuracy of the model
Feelings What your user might be thinking and reeling at the moment	System ready to use	Camera is perfect	Attractive user interface	User friendly	Gesture captured clearly	Tasks done exactly according to the gesture	Browsing done correctly	Delighted to see accurate output
	Technical issues	Camera quality issues	Difficulties in understanding the user interface	Unreliable	Gesture not captured properly	Bad lightings	Wrong tasks performed	Irrelevant movements
